Introduction The electronic control units (ECU) allow to monitor and manage different types of applications in the hydraulic field.

Thanks to specific algorithms, Bondioli & Pavesi ECUs acquire information on the state of the system and carry out corrective measures and actions necessary to guarantee certain functions. These can be related to safety requirements, generic control strategies or specific customer requirements.

The management of inputs and outputs can be implemented in various systems of pre-existing interconnected components.

Diagnostic functions are available on all models such as the detection of electrical disconnections, short circuits, open circuits, but also the monitoring of outputs and the signalling of alarms.

The outputs, with double activation consent, return current feedback and are available in version on/off or PWM.

The ECUTuner application software is also available for configuring the parameters during calibration and checking the diagnoses on the system. The interface is intuitive and can be set at different access levels.

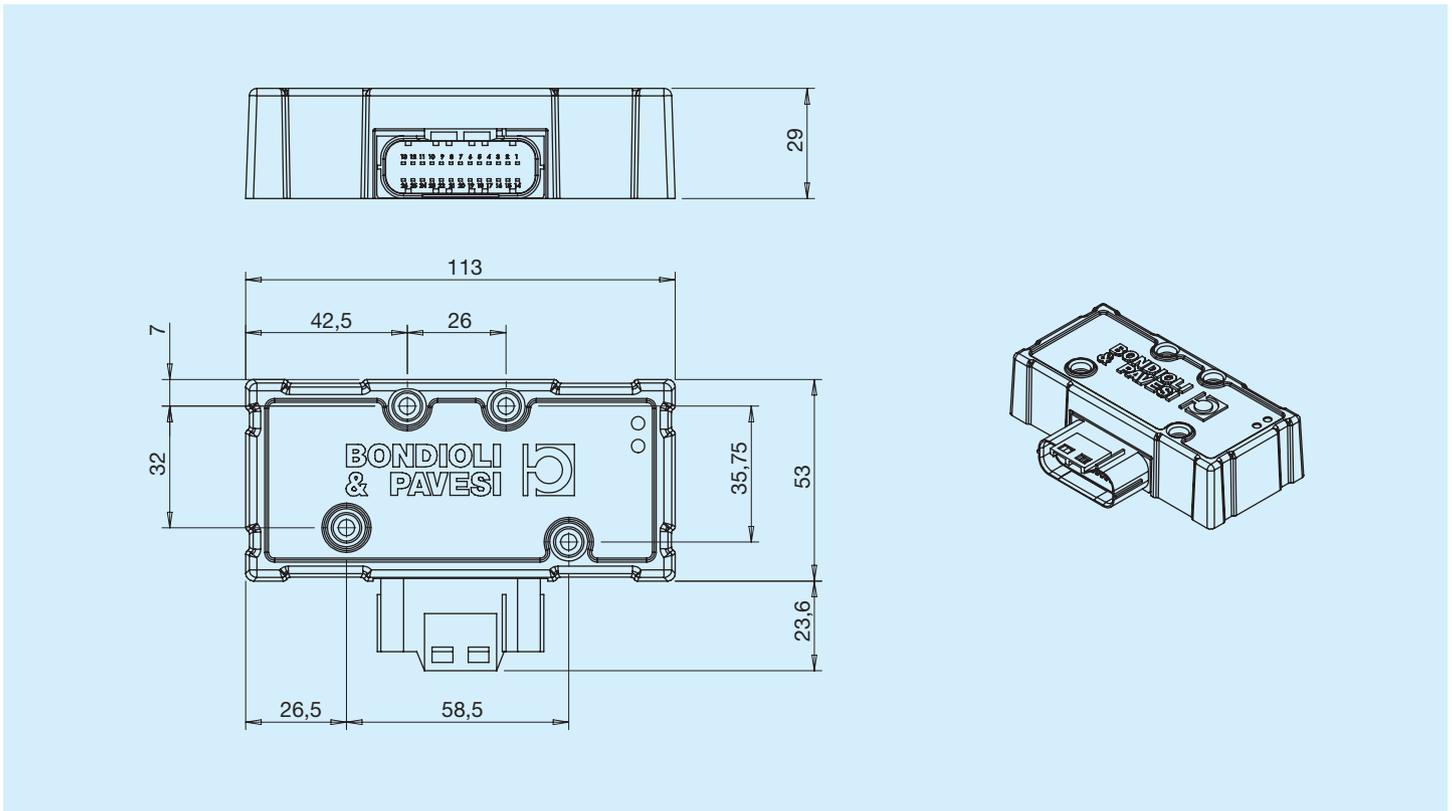

HPEE55 Series

Standard applications

Prior to use, carefully read the GENERAL INSTRUCTIONS FOR USE OF ELECTRONIC CONTROL UNITS

Dimensions

Electrical and electronic characteristics

Power supply		9 - 32 Vdc
Current consumption	Standby	80 mA
	Maximum current on one channel	3 A @ 12 Vdc 2 A @ 24 Vdc
	Maximum total current	4 A @ 12 Vdc 3 A @ 24 Vdc
Sensor power supply +5V		2; (5 ± 0.25) V; 100 mA
Main microcontroller		8 bit - 32 MHz
Safety microcontroller		no
Safety Integrity Level / Performance Level / Agricultural Performance Level (IEC 61508 / UNI EN ISO 13849 / UNI EN ISO 25119)		SIL 1 / PL C / AgPL C
Electromagnetic Compatibility (EMC)	According to the standards:	ISO 13766 ISO 7637 ISO 11452 ISO 14982
CAN BUS connection		1 CAN 2.0B, ISO11898
RS232 connection		1
Connector		JAE 26-way - counterpart HPECNS00700

Input

Type	N°	Activation	Frequency	Type	N°	Range
Digital	4	VBatt+	-	Analogue	2	0-5Vdc 0-10Vdc 0-20mA
Frequential	2	GND	10kHz max			

Output

Type	N°
Digital / PWM	4 (2 combinable current feedbacks)
PWM output frequency	100 - 400 Hz

Mechanical and environmental characteristics

Operating temperature	(-25 ... 85) °C (-13 / 185 °F)
Storage temperature	(-40 ... 85) °C (-40 / 185 °F)
Protection index*	IP67
Resistance to vibration	UNI EN 60068-2-6
Shock resistance	ISO 15003, section 5.5.2 level 3

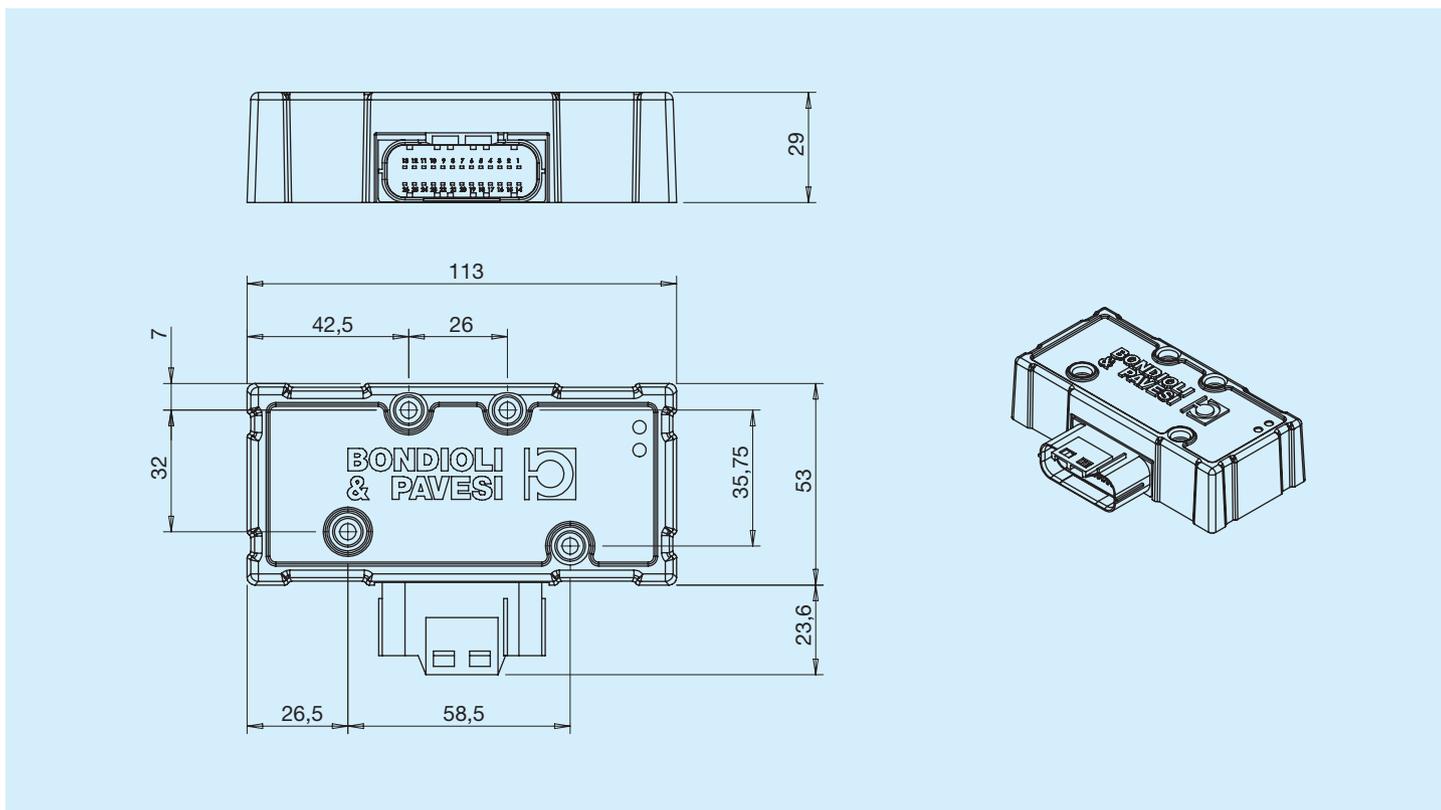

* With correctly fixed connector
The unused pins must be suitably plugged.

HPEE69 Series
Standard and safety relevant applications

 Prior to use, carefully read the GENERAL INSTRUCTIONS FOR USE OF ELECTRONIC CONTROL UNITS

Dimensions

Electrical and electronic characteristics

Rated voltage	9 - 32 Vdc	
Current consumption	Standby	80mA
	Maximum current on one channel	3A @ 12Vdc 2A @ 24Vdc
	Maximum total current	4A @ 12Vdc 3A @ 24Vdc
Sensor power supply +5 V	2; (5 +/- 0.25) V; 100mA	
Main microcontroller	8bit - 32MHz	
Safety microcontroller	8bit - 16MHz	
Safety Integrity Level / Performance Level / Agricultural Performance Level (IEC 61508 / UNI EN ISO 13849 / UNI EN ISO 25119)	SIL 2 / PL D / AgPL D	
CAN BUS connection	1 CAN 2.0 B, ISO11898	
RS232 connection	1	
Electromagnetic compatibility	According to the standards:	
	ISO13766	
	ISO7637	
	ISO11452 ISO14982	
Connector	JAE 26-way - counterpart HPECNS00700	

Input

Type	N°	Activation	Frequency
Digital	4	VBatt+	-
Frequency	2	GND	10kHz

Type	N°	Range
Analogue	2	0-5Vdc 0-10Vdc 0-20mA

Output

Type	N°
PWM digital outputs	4 (2 combinable current feedbacks)
PWM output frequency	100 - 400 Hz

Standard Functional safety

ISO 25119 - parts 1, 2, 3 and 4: 2019

UNI EN ISO 13849 - part 1: 2016, part 2: 2013

Mechanical and environmental characteristics

Operating temperature	(-25 ... 85) °C (-13 / 185 °F)
Storage temperature	(-40 ... 85) °C (-40 / 185 °F)
Protection index*	IP67
Conforms to vibrations UNI EN 60068-2-6	Yes
Conforms to mechanical shocks ISO 15003, par. 5.5.2 level 3	Yes

* With correctly fixed connector
The unused pins must be suitably plugged.

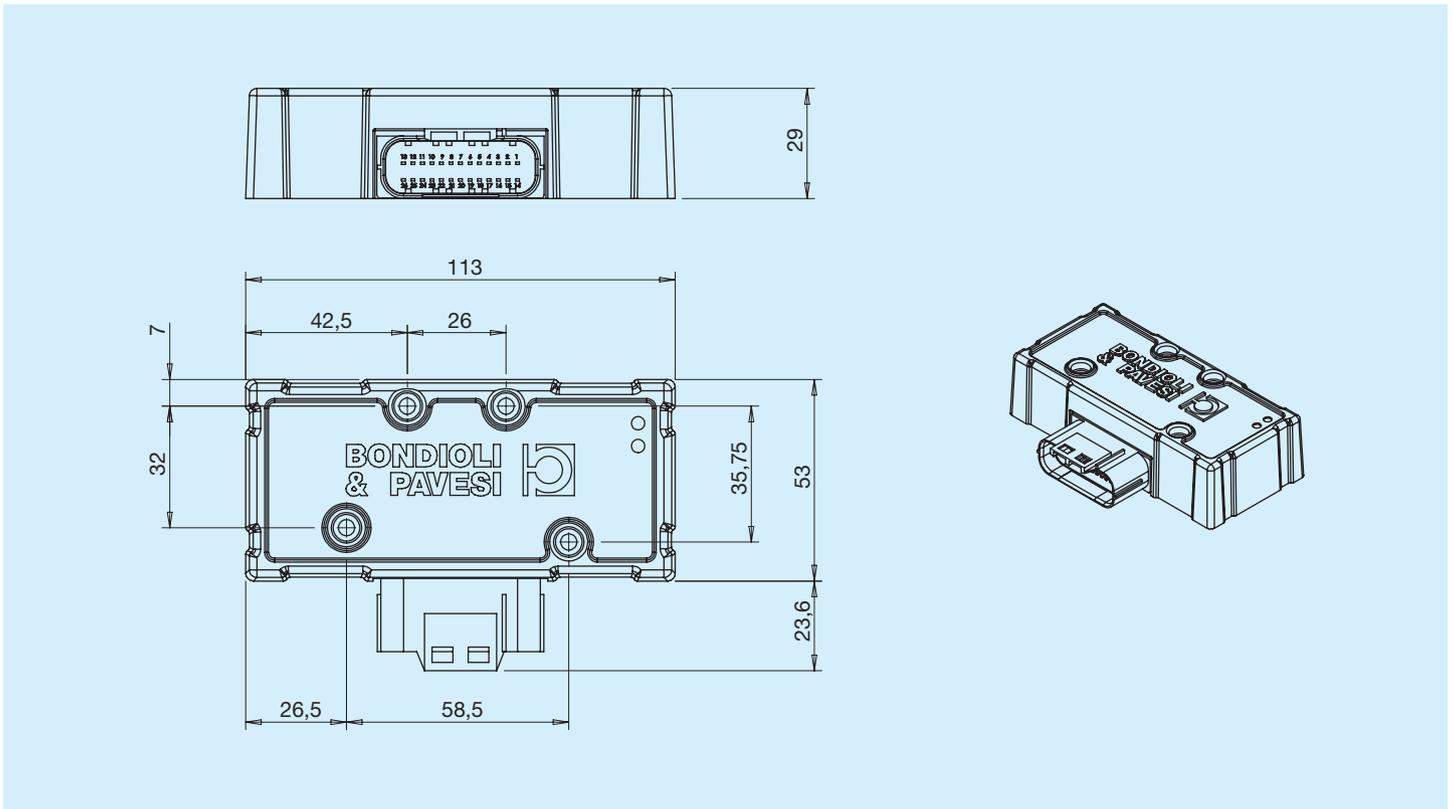

HPEE70 Series

Standard and safety relevant applications with multiple frequency inputs

Prior to use, carefully read the GENERAL INSTRUCTIONS FOR USE OF ELECTRONIC CONTROL UNITS

Dimensions

Electrical and electronic characteristics

Rated voltage	9 - 32 Vdc	
Current consumption	Standby	80mA
	Maximum current on one channel	3A @ 12Vdc 2A @ 24Vdc

JAE 26-way connector kit HPECNS00700 - For SMAT series

Connector kit composition

Quantity	Description
1	Connector body
1	Secondary lock
30	Female contacts
15	Plugs for unused contacts
1	Cable protection bellows

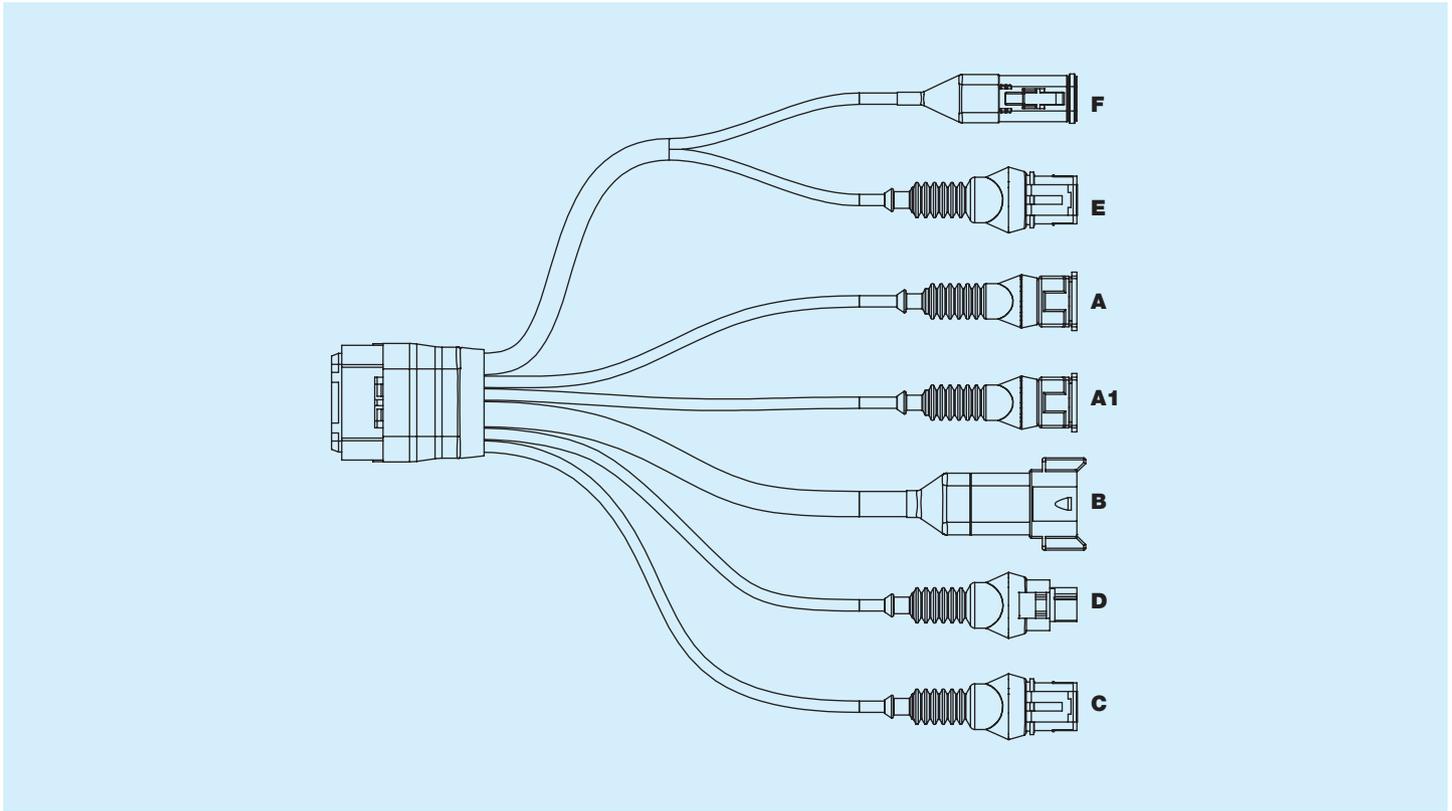

Connectors DT06-4S, DT06-6S, DRC26-

Connector kit composition

Quantity	Description
5	Deutsch type 1 blanking plugs
10	Deutsch type 2 blanking plugs
12	Deutsch type 1 female contacts
25	Deutsch type 2 female contacts
1	24-way Deutsch DRC series male connector
1	6-way Deutsch DT series male connector
1	4-way Deutsch DT series male connector
1	Deutsch cover for 24-way male connector
1	Deutsch cover for 6-way male connector
1	Deutsch cover for 4-way male connector
1	Contact block for 6-way male connector
1	Contact block for 4-way male connector
1	Extraction tool

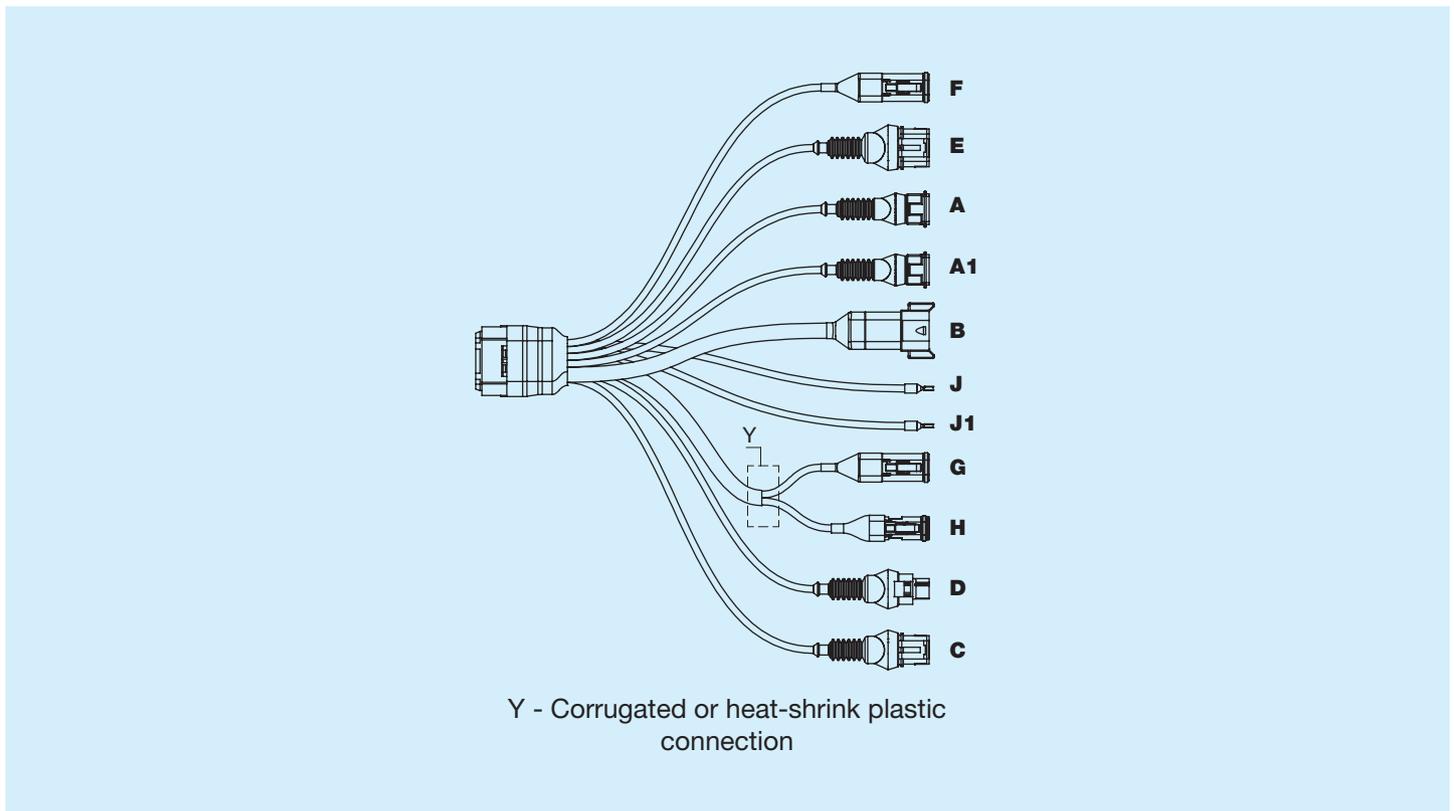

Electrical wiring HPE5WHSMA025R - Typical use: SMAT55 - SMAT69

Connector	Function	Type	Length*
OUT F	Motor pressure sensor	Deutsch 4-way (DT06-4S)	1100 ± 20 cm
OUT E	Motor RPM sensor	AMP Sseal 3-way (socket)	900 ± 20 cm
OUT A	Proportional valve A	AMP JT 2-way (pin) seal version	400 ± 10 cm
OUT A1	Proportional valve B	AMP JT 2-way (pin) seal version	400 ± 10 cm
OUT B	External connection	Deutsch 8-way (DT04-08PA)	300 ± 10 cm
OUT D	Pump angle sensor	MCON 3-way (socket)	550 ± 10 cm
OUT C	Pump RPM sensor	AMP Sseal 3-way (socket)	300 ± 10 cm

* from the two ends of the connector

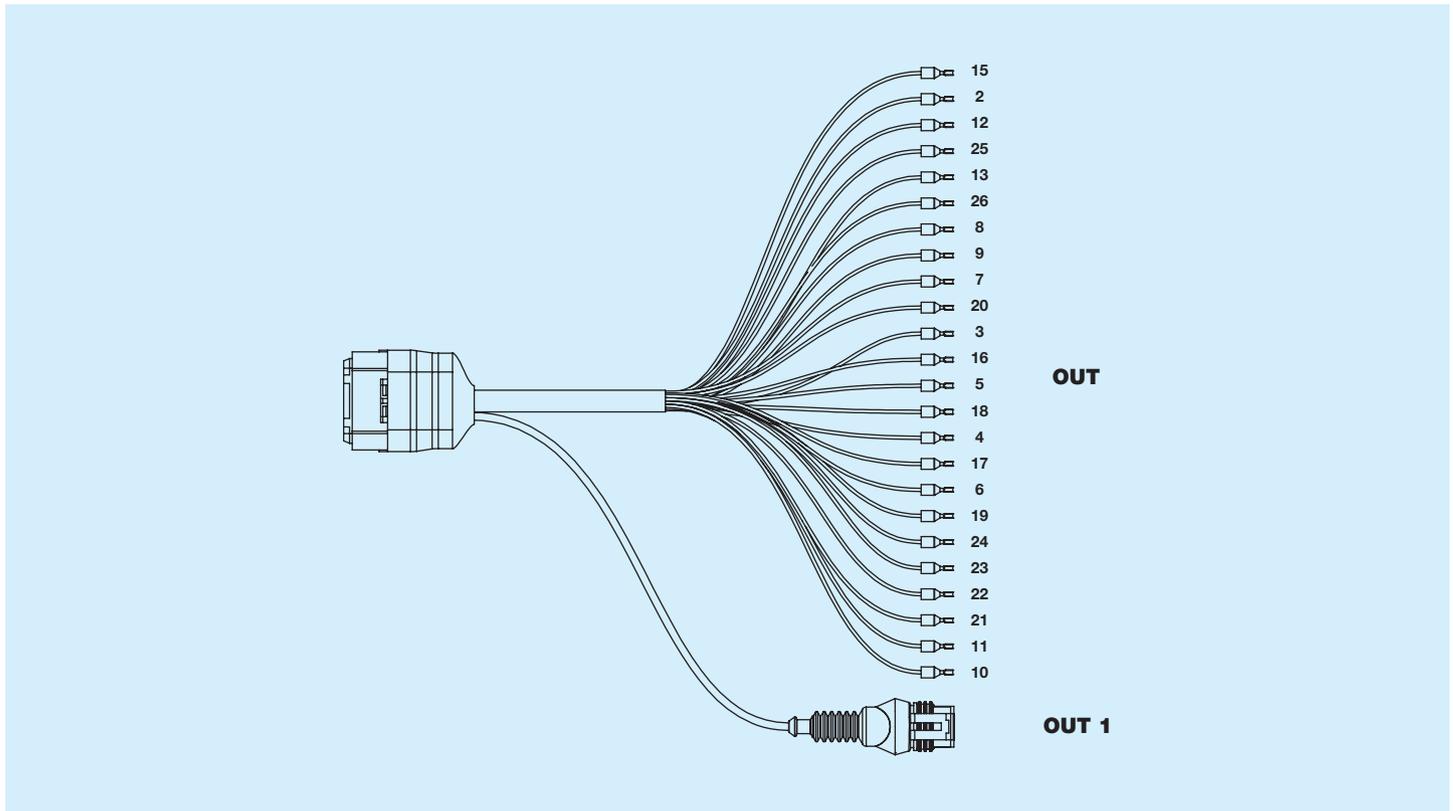

Electrical wiring HPE5WHSMA061R - Typical use: SMAT70

Connector	Function	Type	Length*
OUT F	Motor pressure sensor	Deutsch 4-way (DT06-4S)	1400 ± 20 cm
